## **Pat. Information Englisch**

Important information for patients with limited knowledge of the German language.

Dear patients,

please pay attention:

Radiological studies only can be performed safely and correctly if you completely understand the process, the clarification and the possible risks of the examination.

If you barely or don't speak German, the presence of an appropriate companion or a translator is required.

This person translates the medical information for you and makes sure you understand everything right.

Without translator or an appropriate companion the examination can not be performed.

A safe communication between you and our medical staff is required by law (§630e BGB) and is important for your own safety especially when a contrast medium is used or in case of an emergency.

Therefore please bring an appropriate companion or a translator with you.

Thank you for your understanding and your support so we can perform your examination safely, accurate and according to the guidelines of the law.

Sincere regards,

Your Management
